A great change in the weather took place Wednesday night. It grew colder and a great wind arose which continued all day Thursday with heavy snow flurries in the afternoon, which made it very disagreeable to get about the streets.

Michael R. Boler, who was his father's official deputy in the county treasurer's office for four years, and an assistant to Treasurer Blume since the beginning of his term, and one of the most efficient and genial young men in Dakota county, has accepted a position with the C. Shenberg company of Sioux City. Mike will be much missed at the court house.

John Stough, a pioneer of Dixon county of 1856, and S. P. Mikesell of 1866, were attending court here a couple of days this week. Mr. Stough can remember and can state the hardships of those early times. He with others had a hard time getting through the winter of 1856-7. LIVER TROUBLES

"I used Thedford's Black-Draught a good medicine for liver disease. It cured my son after he had spent \$100 with doctors. It is the best medicine I take."—MRS. CAROLINE MARTIN, Packerburg, W. Va.

If your liver does not act regularly go to your druggist and secure a package of Thedford's Black-Draught and take a dose tonight. This great family medicine frees the constipated bowels, stirs up the torpid liver and causes a healthy secretion of bile.

Thedford's Black-Draught will cleanse the bowels of impurities and strengthen the kidneys. A torpid liver invites colds, biliousness, chills and fever and all manner of sickness and contagion. Weak kidneys result in Bright's disease which claims as many victims as consumption. A 25-cent package of Thedford's Black-Draught should always be kept in the house.

"I used Thedford's Black-Draught for liver and kidney complaints and found nothing to equal it."—WILLIAM COFFMAN, Marblehead, Ill.

### COMFORT OF VISITORS TO THE WORLD'S FAIR.

Excellent Provision Made For Public Convenience in the Grounds and Buildings of the Exposition—Everything Necessary Provided For.

Special attention has been paid by the builders of the Louisiana Purchase Exposition to the comfort of those who will attend. It is not an exaggeration to assert that no previous exposition has provided so many public conveniences. First of all, there will be plenty of places where one may sit down and rest after seeing the sights until physical fatigue demands relaxation. And this calls to mind an amusing little story of the Columbian exposition at Chicago.

The little granddaughter of Professor J. M. Greenwood, superintendent of public schools in Kansas City, attended the exposition with relatives, who made it their business to show the child many things that would be educative. From time to time the party found it necessary to sit down and rest. Returning home, the learned grandfather asked the little girl this question: "Well, my dear, from what one thing that you saw at the fair did you derive the greatest benefit?"

"The chairs, grandpa," promptly replied the child.

The chairs will be greatly in evidence at St. Louis. Thousands of comfortable cane bottom chairs and settees for the free use of visitors will be found in the retiring rooms in the great exhibit palaces. But at this Exposition there will be resting places unknown to former fairs, for within the grounds there are many acres of wooded land which are not occupied by buildings. With 1,240 acres at their disposal it has been an easy matter for the builders to create the biggest Exposition ever known and still have many breathing spaces to spare. Under the trees of the forest—a part of Forest Park—the public will find numerous seats where, beneath the cooling shade, may be enjoyed a reasonable period of rest, so that the visitor, as though sitting in a quiet park, may look beyond the trees at the domes and towers of the Exposition.

In each of the exhibit palaces and the state and foreign buildings there are public retiring rooms, many of which are provided with wash basins. Scattered throughout the grounds will be a number of separate structures for similar uses. Provision will be made whereby for a small fee the visitor may have toilet accommodations with water and towels.

As to drinking water the total need have no fears. An arrangement has been made with a concern that will bring pure clear water from a famous spring at De Soto, Mo., to be piped over the grounds from large tanks, refilled twice daily and supplied to the visitors at attractive booths for a cent or so a drink, which means of many glasses as one may require to quench the thirst. Filtered water from the Mississippi river also will be supplied.

Those whose zeal for seeing the sights is in excess of their walking or standing powers may hire roller chairs at a small expense, and for traveling greater distances in the grounds the Intramural Railway, with comfortable cars specially constructed for observation purposes, will furnish a mode of conveyance superior to any yet provided at an exposition.

Then there will be the 2,500 Jefferson Guards in uniform, a part of whose business will be to give free information to visitors. These are bright young men, many of whom will have been on duty for months prior to the opening, and they are expected to be walking encyclopedias of Exposition information, able to direct the visitor about the grounds without consulting a guidebook.

An excellent hospital system is being installed, with several branch hospitals, where capable physicians and nurses will be on hand, so that in the event of illness prompt attention and treatment may be had.

The largest organ ever built, with 145 stops and pipes five feet in diameter, is in Festival Hall. It will be used for concerts and other musical features held in this structure.

A fireproof building containing 2,000 safety deposit boxes is provided for the use of the World's Fair visitors. Money and other valuables may be left in safe keeping for a small fee.

The Liberty bell will be exhibited in the rotunda of the Pennsylvania building. It will be the first time it ever crossed the Mississippi river.
